Butterfly Identification Training Day

Friday 20th May 2011, 10.00 am - 4.45 pm
Afan Forest Park, Port Talbot

Trainer: Richard Smith (Butterfly Conservation Wales)

Butterflies are important species. Not only are they attractive to look at, they are also valuable environmental indicators. Many species are in decline, and five species of butterfly in the UK have become extinct over the past century. This event aims to encourage butterfly recording by improving skills in their identification.

The day will include:

- How to record butterflies
- ID of common & widespread species
- ID of "habitat specialist" species
- Outdoor workshops *weather permitting!
- Field techniques

This event is **free** and open to all (no experience necessary!) but **booking is essential** as spaces are limited. Please complete the booking form, and return it to SEWBReC (contact details below).

SEWBReC, 13 St Andrews Crescent, Cardiff, CF10 3DB
